

ASHI

Laboratory Manual

Edition 4.1

Supplement 1

New Procedures

January 2006

In this Supplement....

- A Donor-Specific Solid-Phase Immunoassay for the Detection of Anti-MHC Class I and MHC Class II Alloantibodies** **I.D.1.2**

- HLA Typing using Reverse SSO and Luminex^R Technology** **V.C.5.2**

- DNA Typing by PCR-SSOPH for HLA DR β and -DQB1 Using Biotest ELPHA (Enzyme Linked Probe Hybridization Assay) Kits** **V.C.5.3**

- HLA Typing by Reference Strand Mediated Conformation Analysis (RSCA) using the Pharmacia ALF Express Sequencer** **V.C.5.4**

- HLA-A, B, C, DRB1 and DQB1 SSO Line Strip Typing with the Dynal RELITM System** **V.C.5.5**

- SSOP Applications for Class II HLA Testing: Use of INNO-LiPA Reverse SSOP Method** **V.C.5.6**

- Antibody Detection by Luminex^R Using Antigen Coated Beads** **VI.B.4.2**
